

FIRST AVENUE PAVING MUST NOW GO ON.

Further Delay Will Result in the
City Making the Impor-
tant Improvement.

Commissioner Collis Exasperated by
the Tactics of the Second Ave-
nue Railroad Company.

PRESIDENT HART RETURNS AT LAST.

Letters from the Department of Public
Works Brought to His Attention.
Immediate Action Ex-
pected.

General Collis, Commissioner of Public
Works, and Deputy Commissioner Howard
Payson Wilds, are exasperated by the
delay of the officials of the Second Avenue
Railroad Company in the matter of laying
asphalt paving between and bordering the
company's tracks on First avenue, and un-

BANCROFT GOES TO SEA.

Little United States Cruiser Starts on Her
Journey to the Bosphorus to Pro-
tect American Interests.

With clouds of black smoke pouring from
her funnel, the cruiser Bancroft weighed
anchor at 2:45 yesterday afternoon and
started on her journey to the Bosphorus.
It was originally intended to make the
start at 1 o'clock, but it was found im-
possible to get all of the stores on board in
time.

About noon a water boat drew alongside
the Bancroft and 12,000 gallons of fresh
water were pumped into her tanks. The
last thing to go aboard was a boatload of
bread and some live fowls.

The Bancroft will go from here to Enayl,
where she will remain for a few days. The
journey will occupy eleven days. After
coasting she will proceed to Gibraltar,
where she will remain for a few days. The
Bancroft is a Constaninople. There is
time the officers think she will have been
at sea seventeen days. Whether or not
she will be directly to Constantinople de-
pends upon the movements of the ship
of the officer in those waters. It is not
definitely known that the Bancroft will
be allowed to pass through the Dardane-
lles, but as she mounts only six guns, it
is thought that there will be no objection
on the part of the Porte. There is a
treaty which stipulates that no vessel of
more than six guns shall enter the harbor
at Constantinople.

Lieutenant-Commander Belknap is in
charge of the Bancroft, next in command
is Lieutenant Vessley. Paymaster Richard
Haiton will look out for the sailors from
the ship.

NO FOOD OR DRINK FOR ORTHODOX JEWS.

Yom Kippur, the Day of Atone-
ment, Will Be Observed by
Fasting and Prayer.

Faithful Will Assemble in Synagogues
for Profound and Penitent
Devotion.

FROM SUNDOWN TO SUNDOWN.

Homilies Will Be Few, but Discourses on
Popular Subjects by Rabbis of
the City Will Be
Many.

From sundown to-day until sundown to-
morrow the orthodox Jews of New York
will abstain from food and drink. No such a dry
crust of bread or drop of water is per-
mitted to pass their lips, and the day, Yom
Kippur (the day of atonement), is spent in
the synagogue, in profound penitent
devotion and constant prayer.

This, according to Leviticus xlii, 20-22,
should be conscientiously observed by all
Israel, but in this land the Reformed He-
brews have thrown off the yoke of the
rabbinical sanctities almost entirely, and
the result is that in the magnificent tem-
ples uptown much of the burdensome cer-
emonies of this important day of the Jewish
church year is done away with, so that to
almost everything a figurative interpreta-
tion is given.

Though, on account of the increased Jew-
ish population of New York, not only all
the large synagogues and temples of the
city will be filled to overflowing with wor-
shippers, but also a number of theatres
and halls in the Bowery and the East Side,
yet the most conservative are complaining
of what they term religious retrogression.
On the one hand there are many on the
East Side, known as Hebrew Anarchists,
who have determined this year to show
their opposition to their orthodox kin, by
holding a hilarious celebration in Chren-
den Hall, which in all respects will be
antithetical to the melancholy ritual of the
rabbinical sanctities. On the other hand
there are hundreds of the wealthier Jews,
leaders of commerce, who may show their
loyalty by abstaining from food and drink,
but in their temple pews, and whose big
stores in Broadway and other business
streets are well stocked.

As conservative a paper as the Jewish
Messenger says: "Many Jewish merchants
keep Labor Day strictly, but think that
their duty to the important day of the
faith is done if they allow observant em-
ployees to remain away without loss of
wages. This was when Broadway and
other thoroughfares below Fourteenth
street showed an almost unbroken suc-
cession of closed stores and business
places. Now the list of Jewish merchants
is increased, but outwardly the coming of
these days seems to make no difference.
So with the exchanges; there was always
a dullness of business on days when Jew-
ish members absent themselves for ritual
reasons. I have yet to learn that people
were less happy or less prosperous when
they were more numerous."

The only homilies which will be delivered
to-day by the rabbis are in the nature of
exhortation of Scripture lessons from the
Torah and cannot be called in any sense
homilies. Some of the Jewish pastors depart
from this ancient custom to suit modern taste,
as will be seen from the following an-
nouncements.

Dr. Louis A. Alexander, of Congrega-
tion Atreth Zehn, announces as the
subject of his Yom Kippur sermon, "A Walk
Through Israel's Palaces." Rabbi Stephen S.
Wise holds a discourse this evening in
the Madison Avenue Synagogue on "Broken
Vows, and to-morrow morning his theme will be "Being Not
Seeming."

Rabbi S. H. Sonnenschein preaches to-
night in the Fifth Avenue Temple on
"Clay in the Hand," and to-morrow
morning on "The Ten Commandments and
the Searchlight of Remorse."

Similar subjects are announced for all the
synagogues. Two days hence, on the
15th of Tishri, Succoth, or the Feast of
Tabernacles, will be celebrated.

LETTERS FROM CHARLEY.

Miss Booker Produces Love Missives in
Court to Show Mr. Burnell's
Affection.

The ability to write love letters possessed
by Charles H. Burnell, of No. 44 West
Ninety-eighth street, was brought to light
in the City Court yesterday. Burnell is a
widower, thirty-five years old, and is the
proprietor of a storage warehouse.

He brought an action upon the default
and set aside a judgment got against him
by Miss Margaret Booker, twenty-two
years old, of No. 261 West Thirtieth
street.

Miss Booker was engaged a year ago by
Burnell to look after his house. She left
Burnell's premises early in the morning
of June 19, she says, because of his per-
sistence in wanting to marry her. She took
a trunk, clothing and a silver watch. Burn-
ell claims the trunk is contents of the
watch were his property. That evening
Burnell had Miss Booker arrested at Nin-
ty-eighth street and Columbia avenue,
charging her at the station house with lar-
cey. The girl indignantly denied that the
property she took belonged to Burnell. She
spent the night in a cell crying.

When arraigned in the Harlem Court the
following complaint was read to make a
complaint, and the girl was discharged.
With her affidavit Miss Booker submitted
copies of letters written by Burnell, of
which reads as follows:

May 22, 1896.
Dear Little Margaret—Don't go till I see you.
Come down Saturday, Sunday or Monday
morning. Tell me what I pay expense, for you
must not go away till you see me. Don't send
home for your luggage. I will send you a
bottle of beer or a can of tomatoes. Alah
and I are keeping bachelor hall, and how he
and I are. But you will see me, I trust, you
must. You will, won't you? CHARLEY.

Miss Booker brought suit against Burn-
ell for \$5,000 for false imprisonment. He
is in no appearance, the case came to the
Sheriff's jury, and she was awarded \$474.62.
It was to set aside this judgment that the
action was brought. Burnell, who had been re-
ported to be practically out of danger, has
been reported to be practically out of danger.
There is grave fear, however, that he may
lose his eyesight, the bullet having passed
behind the orbits of both eyes.

No operation has yet been performed.
The use of X rays to locate the bullet is
seriously contemplated, but Superintendent
Brookbridge, of said that this had not as yet
been actually determined upon.

Tyson had worked as a laborer for five
years in Brooklyn, and had meanwhile
studied with a view to entering some col-
lege. He entered the Hackettsville Insti-
tution, only last Thursday, and became im-
mediately very dependent and ex-
cessive. He feared, but he had been re-
solved to keep up with the class. On Saturday he
purchased the revolver, went to his room and
shot himself.

SCHOLARS BARRED FROM NORMAL COLLEGE.

Only Six Hundred Seats to Ac-
commodate Eight Hundred
and Forty Pupils.

School Commissioners Inclined to
Shift the Blame on City
Authorities.

LATTER SHOULD HAVE SOLD BONDS.

Labor Organizations Suggest That More
Room Be Provided for the Little
Ones by Using the
Armories.

There are six hundred seats in the Normal
College to accommodate 840 scholars.
Fourteen hundred graduates of grammar
schools were recently examined for ad-
mission, and although the percentage was pur-
posely placed high, yet 840 passed. What
to do with them is one of the problems
that confronts the school authorities.

Commissioner Charles B. Hubbell called
the matter to the attention of the trustees
of the college at their meeting yesterday,
but nothing was done. The Executive
Committee handed in a report asking the
Board of Estimate and Apportionment for
\$150,000 for the coming year for the main-
tenance of the college. Nothing has been
done either to solve that other problem
of school accommodations for eighteen
thousand children to whom admission to
the primary department and lower grades
of the grammar department was denied on
Monday.

Superintendent Jasper had instructed
principals to exercise discretion in admit-
ting young children and give the seats as
far as practicable to those between the
ages of eight and fourteen years. In con-
sequence the larger number of the excluded
is of those applicants from five to eight
years of age.

Many of these might be accommodated by
increasing the half day classes in the few
schools which are not now packed, but on
account of their tender years the little
ones would not be permitted by their par-
ents to go the great distances from home
that would be necessary.

The Board of Education is not inclined to
do this. The members shift the responsibility
for the situation on the city authorities,
and the city authorities shift it on the
labor organizations. On the other hand
there are hundreds of the wealthier Jews,
leaders of commerce, who may show their
loyalty by abstaining from food and drink,
but in their temple pews, and whose big
stores in Broadway and other business
streets are well stocked.

As conservative a paper as the Jewish
Messenger says: "Many Jewish merchants
keep Labor Day strictly, but think that
their duty to the important day of the
faith is done if they allow observant em-
ployees to remain away without loss of
wages. This was when Broadway and
other thoroughfares below Fourteenth
street showed an almost unbroken suc-
cession of closed stores and business
places. Now the list of Jewish merchants
is increased, but outwardly the coming of
these days seems to make no difference.
So with the exchanges; there was always
a dullness of business on days when Jew-
ish members absent themselves for ritual
reasons. I have yet to learn that people
were less happy or less prosperous when

purchased the revolver, went to his room and
shot himself.

THE TREATMENT THAT CURES.

How Doctor Copeland's Wonderful Medication Does Its Beneficent
Work for Suffering Humanity.

It Reaches, Soothes and Heals Every Part of the Mucous Membrane, Curing
Invariably All Forms of Catarrhal Disease of the Nose, Throat, Vocal
Cords, Bronchial Tubes, Lungs and Deafness—Doctor Copeland Gives His
Famous Symptom Questions, Describing Disease in Its Different Forms,
and Cites Instances of Notable Cures.

THE TREATMENT THAT CURES.

Doctor Copeland's new treatment,
that has lifted the darkness and blight of
the word "Incurable" from hundreds of
thousands of these cases of Catarrh in the
Ears, Bronchial Tubes and Lungs, works
its curative action for two reasons:

(1) It seizes every sore spot, from
the centre of the nose to the deepest
part of the lungs, to the inner-
most recesses of the middle ear.

(2) Instead of irritating, inflaming
and feeding the fires of the dis-
ease, it soothes, quiets, heals and
cures.

What is this treatment that cures these
conditions, once regarded incurable? By
what process does it restore the diseased
membrane, remove the poison and relieve
the soreness of disease? Let the ex-
perience of patients cured and being cured
tell.

HOW IT CURES

COMMON CATARRH.

Here is a patient taking treatment
for Catarrh of the Head. He breathes the
soothing medication through his nostrils,
and the nasal channels open, the stuffed-
up feeling in the head leaves, and he can
breathe naturally through the nose again.
The dull pains across the front of the head
fade away, and the nasal membrane is
soothed until the inflammation and sore-
ness are all gone. The bad odor of the
nose passes away, and the lost sense of
smell returns. The dripping in the throat
is checked, the nose does not sneeze and
sniffing has ceased, and the discharge
from the nose grows less and less, and
finally stops altogether. The disease has
been checked and eradicated from the
system before it even reached his throat.
He has been driven down into his throat
or into his lungs or into his ears, as so
often is done by other treatments.

HOW IT CURES

CATARRH IN THE THROAT.

Here is another patient who had
Catarrh in the Head. He caught cold after
cold, and the disease spread down into his
throat. He breathes and talks and swallows
with difficulty. It bates the mem-
branes of his head and throat. The
soreness of the head and throat becomes
less and the desire to hawk and spit is
appearing, the sense of taste is returning
and the voice again becomes soft and me-
lodious. There is no more
coughing in the morning. No longer does
every exposure to the weather result in a
stuffed-up throat that becomes sore and
aching, and no longer does he find his
throat and tongue dry as chips when he
wakes from an unrefreshing sleep.

HOW IT CURES

CATARRH OF VOCAL CORDS.

Here is another patient who con-
tracted Catarrh that extended from the
throat into the glottis, the gateway that
opens to the windpipe and lungs. The dis-
ease attacks the vocal cords, this sensitive
instrument of the human voice, and soon
mars its sweet tones or destroys them al-
together. Here sits a lady, detailing the
troubling preparation. She had been ten
months silent, and the treatment has al-
ready restored her voice. Who can say
that she feels in being restored to the
usefulness and the pleasure of conver-
sation?

HOW IT CURES

CATARRH OF DEAFNESS.

Here is another patient who for
years had been a sufferer. Every fresh
cold seemed to stay longer than former
colds, and he noticed that his ears got
stuffed up and his hearing became duller
and duller, and there were ringing and
buzzing noises in his ears. The Catarrh
had passed upward and backward from the
throat along the Eustachian tube leading
from the throat into the ear. He had
consulted throat doctors and ear doctors and
Catarrh doctors without relief. In this
condition he had lain listening the noises
of the lungs, and he had noticed a
change. The noises in the ears stop, there
is no more discharge, the ears settling bet-
ter, and he feels the tubes of the ears open
up and something seems to give way in
his head. His hearing has completely
returned. He is again a well and happy man.

HOW IT CURES

BRONCHIAL CATARRH.

Here is another patient who was
always sensitive to the weather. He con-
tracted Catarrh of the Head, and it passed
to his throat, then down the windpipe and
into the bronchial tubes. He coughed at
night so that he could not sleep, there
was pain behind his heart bone and under
the shoulder blades. When he coughed he
brought up a frothy, grayish material
streaked with blood, and lost appetite and
strength. He tried cough syrups and dif-
ferent medicines to no avail. He now breathes
in with his inspiration, the restoring and
healing medicine. The sore spots along
the bronchial tubes heal, and cough ceases,
the pain passes, and his strength and
appetite return. He is again a well and happy man.

HOW IT CURES

CATARRH OF THE LUNGS.

Here is another pitiful case. He
had all the history of colds and catarrh,
extending downward from the nose to
throat, to glottis, to windpipe, to the
bronchial tubes, and then into the small
tubes of the lungs. His cough always troubled
him. He raised large quantities of vile
looking material, and he had fever every
afternoon and could not sleep at night.
He had no appetite, and his strength and
ambition failed. He had night sweats
every once in awhile, and feared that his
end was near.

See him after four months of treatment!
A new man. The healing and soothing
medication has done its time, and out
every nook of the disease, even to the ex-
treme depth of his lung cells, and bathed
and cooled and healed the membranes.
There is no more of the nasty discharges,
no more cough, no more fever, no more
pain, no more night sweats. The appetite
returns, and with it come back strength
and ambition. The cheeks fill out and re-
gain their color. The step becomes buoy-
ant. He has been saved from a lingering
but absolutely safe death.

THE PROPER COURSE FOR SUFFERERS.

The proper course for sufferers is
this: Read these symptoms carefully over,
and close at once to your case, and
bring this with you to either of the Copel-
and offices. If you live away from the
city, send them by mail and ask for home
treatment. In either instance, and whether
by mail or office treatment, the patient
may be sure of the speediest relief and
cure possible to enlightened medicine.

SYMPTOMS OF CATARRH

OF THE HEAD AND THROAT.

The head and throat become dis-
eased from a secret cold, and Catarrh
when the condition of
the blood predisposes to this condi-
tion.

HOW IT CURES

COMMON CATARRH.

Here is a patient taking treatment
for Catarrh of the Head. He breathes the
soothing medication through his nostrils,
and the nasal channels open, the stuffed-
up feeling in the head leaves, and he can
breathe naturally through the nose again.
The dull pains across the front of the head
fade away, and the nasal membrane is
soothed until the inflammation and sore-
ness are all gone. The bad odor of the
nose passes away, and the lost sense of
smell returns. The dripping in the throat
is checked, the nose does not sneeze and
sniffing has ceased, and the discharge
from the nose grows less and less, and
finally stops altogether. The disease has
been checked and eradicated from the
system before it even reached his throat.
He has been driven down into his throat
or into his lungs or into his ears, as so
often is done by other treatments.

HOW IT CURES

CATARRH IN THE THROAT.

Here is another patient who had
Catarrh in the Head. He caught cold after
cold, and the disease spread down into his
throat. He breathes and talks and swallows
with difficulty. It bates the mem-
branes of his head and throat. The
soreness of the head and throat becomes
less and the desire to hawk and spit is
appearing, the sense of taste is returning
and the voice again becomes soft and me-
lodious. There is no more
coughing in the morning. No longer does
every exposure to the weather result in a
stuffed-up throat that becomes sore and
aching, and no longer does he find his
throat and tongue dry as chips when he
wakes from an unrefreshing sleep.

HOW IT CURES

CATARRH OF VOCAL CORDS.

Here is another patient who con-
tracted Catarrh that extended from the
throat into the glottis, the gateway that
opens to the windpipe and lungs. The dis-
ease attacks the vocal cords, this sensitive
instrument of the human voice, and soon
mars its sweet tones or destroys them al-
together. Here sits a lady, detailing the
troubling preparation. She had been ten
months silent, and the treatment has al-
ready restored her voice. Who can say
that she feels in being restored to the
usefulness and the pleasure of conver-
sation?

HOW IT CURES

CATARRH OF DEAFNESS.

Here is another patient who for
years had been a sufferer. Every fresh
cold seemed to stay longer than former
colds, and he noticed that his ears got
stuffed up and his hearing became duller
and duller, and there were ringing and
buzzing noises in his ears. The Catarrh
had passed upward and backward from the
throat along the Eustachian tube leading
from the throat into the ear. He had
consulted throat doctors and ear doctors and
Catarrh doctors without relief. In this
condition he had lain listening the noises
of the lungs, and he had noticed a
change. The noises in the ears stop, there
is no more discharge, the ears settling bet-
ter, and he feels the tubes of the ears open
up and something seems to give way in
his head. His hearing has completely
returned. He is again a well and happy man.

HOW IT CURES

BRONCHIAL CATARRH.

Here is another patient who was
always sensitive to the weather. He con-
tracted Catarrh of the Head, and it passed
to his throat, then down the windpipe and
into the bronchial tubes. He coughed at
night so that he could not sleep, there
was pain behind his heart bone and under
the shoulder blades. When he coughed he
brought up a frothy, grayish material
streaked with blood, and lost appetite and

extending downward from the nose to
throat, to glottis, to windpipe, to the
bronchial tubes, and then into the small
tubes of the lungs. His cough always troubled
him. He raised large quantities of vile
looking material, and he had fever every
afternoon and could not sleep at night.
He had no appetite, and his strength and
ambition failed. He had night sweats
every once in awhile, and feared that his
end was near.

See him after four months of treatment!
A new man. The healing and soothing
medication has done its time, and out
every nook of the disease, even to the ex-
treme depth of his lung cells, and bathed
and cooled and healed the membranes.
There is no more of the nasty discharges,
no more cough, no more fever, no more
pain, no more night sweats. The appetite
returns, and with it come back strength
and ambition. The cheeks fill out and re-
gain their color. The step becomes buoy-
ant. He has been saved from a lingering
but absolutely safe death.

THE SYMPTOMS OF EAR TROUBLES.

Deafness and ear troubles result
from catarrh passing along the
Eustachian tube that leads from
the throat to the ear.

Wilber F. Eble, 164
Wright street, Newark,
New Jersey. Cured of
Roaring Noises in the Ears
and Partial Deafness.

"Is your hearing failing?"
"Do your ears discharge?"
"Do your ears itch and burn?"
"Are the ears dry and scaly?"
"Have you pain behind the ears?"
"Is there a throbbing in the ears?"
"Do you have ringing in the ears?"
"Do you have crickets in the ears?"
"Are there crackling sounds heard?"
"Is your hearing bad cloudy days?"
"When you blow your nose do the ears crack?"
"Are there sounds like steam escaping?"
"Do ears hurt when you blow your nose?"
"Do you constantly have noise in ears?"
"Hear better some days than others?"
"Do noises in your ears keep you awake?"
"When you blow your nose do the ears crack?"
"Is hearing worse when you have a cold?"
"Is roaring like a waterfall in the head?"

SYMPTOMS OF CATARRH

OF THE KIDNEYS.

This condition results either from
colds or from overwork of the kid-
neys in separating from the blood
the poisons that have been ab-
sorbed from catarrh.

Hiram Sherman, North
Long Branch, New Jersey,
testifies to the skill of the
Copeland Physicians in
curing Disease of the Kid-
neys.

"Is the skin pale and dry?"
"Is your hair getting gray?"
"Has the skin a waxy look?"
"Is the hair dry and brittle?"
"Is the skin itchy and raw?"
"Do the legs feel too heavy?"
"Is there nausea after eating?"
"Do the joints ache in the morning?"
"Are they cold and clammy?"
"Is the urine dark and scanty?"
"Are the eyes dull and starting?"
"Is there pain in small of back?"
"Do your hands and feet swell?"
"Have you pain in top of the head?"
"Has the perspiration a bad odor?"
"Is there puffiness under the eyes?"
"Is there a bad taste in the mouth?"
"Is there a desire to get up at night?"
"Are there dark rings around the eyes?"
"Do you see spots floating before the eyes?"
"Have you chilly feelings down the back?"
"Do you see unpleasant things while asleep?"
"Does a deposit form when left standing?"

THE GREAT SUCCESS OF

HOME TREATMENT.

The system of treating patients
who live at a distance has been so perfected
that
